

# Drilling & Production Chemicals

As a Oil and Gas Chemical service-oriented company, we have always concentrated on product development and cooperative research with our customers. The Research, Product Development, and Laboratory personnel of our customers become our partners in the development of unique chemical additives to meet the specific and specialized needs of our customer.

Our research laboratories are headquartered in Kuala Lumpur, Malaysia and are comprised of synthesis and application capabilities for each industry we serve.

Our products are used as enhancer, lubricator, rheology stabilizer & improver, surfactant, sealing, inhibitor and breaker in the drilling fluids system.

- \* Nano Descalers
- \* Lubricants and EP Additives
- \* Corrosion Inhibitors
- \* Wetting Agents
- \* Emulsifiers
- \* Hydrotropes
- \* Defoamers
- \* Sludge Breakers
- \* Friction reducers

- \* Nonionics : Low Foam,
- \* Wetting Agents,
- \* Detergency
- \* Alkaline/Acid Stable Surfactants
- \* Stable Surfactants
- \* Oxidizing agent remover
- \* Process plant additives
- \* Electroplating Additives
- \* Viscosifier & Cross Linkers
